Let's dive into Proactive Remediations

Twitter: @JankeSkanke

Endpoint Analytics in Microsoft Endpoint Manager

**STARTUP
PERFORMANCE**

**RECOMMENDED
SOFTWARE**

**PROACTIVE
REMIATIONS**

PROACTIVE REMEDIATIONS

What is Proactive Remediations?

- **Proactive remediations in Endpoint Analytics allows us to**
 - **Fix common issues**
 - **Have a desired state config of our clients**
 - **Notify our users about x , y or z**

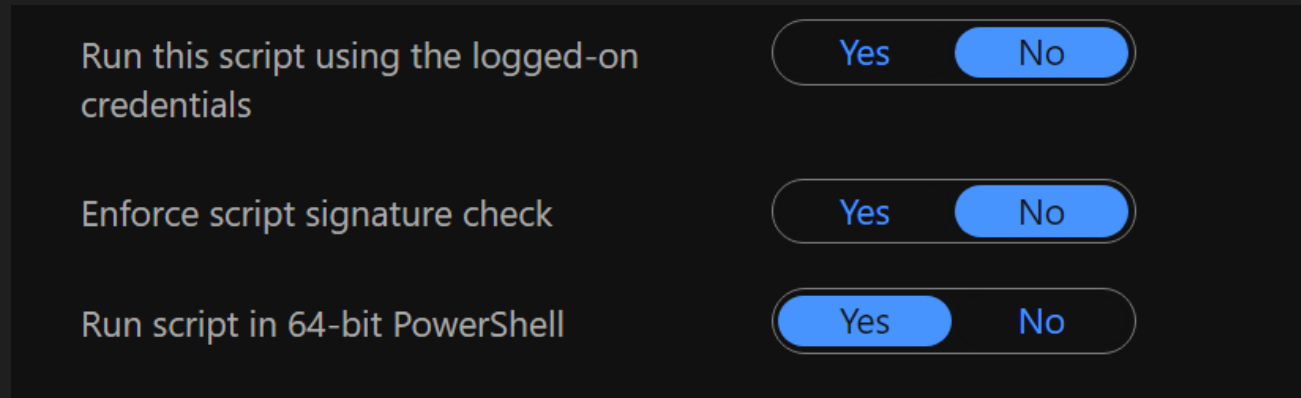

- **Proactive remediations is using script packages that consists of**
 - **A Detection Script**
 - **A Remediation Script**

Prerequisites

- **Devices must be enrolled into Endpoint Analytics**
- **Devices must be Azure AD joined or hybrid Azure AD joined and meet one of the following conditions:**
 - **A Windows 10 Enterprise, “Professional”, or Education device that is managed by Intune.**
 - **A co-managed device running Windows 10, version 1903 or later.**
- **Licensing: Proactive Remediations:**
 - **Windows 10 Enterprise E3 or E5**
 - **Windows 10 Education A3 or A5**
 - **Windows Virtual Desktop Access E3 or E5**

Script Requirements

- PowerShell
- Encode the scripts in UTF-8
 - If you don't you will get issues.
- Maximize output limit from script is 2048 Characters
- Scripts without the Enforce Script Signature check use the Bypass execution policy
 - Scripts with the check will use the execution device's policy (default restricted)

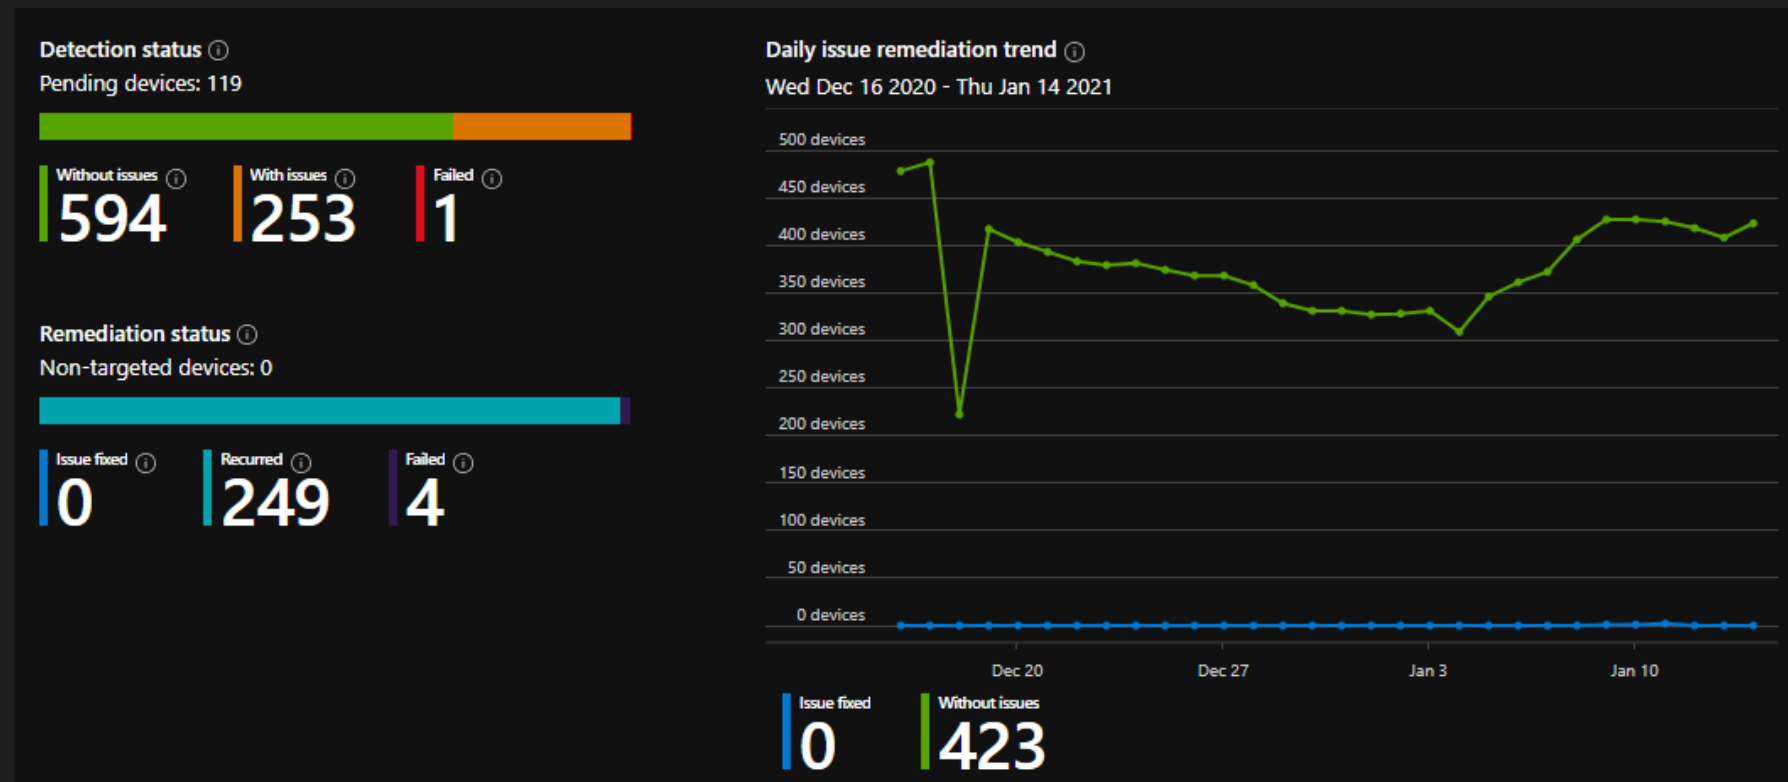

A screenshot of a PowerShell configuration window showing three settings with toggle buttons:

Run this script using the logged-on credentials	Yes	No
Enforce script signature check	Yes	No
Run script in 64-bit PowerShell	Yes	No

Benefits

- Script jobs can be scheduled
- Run in user context vs system context
- Run in 64bit PowerShell or not
- Good Reporting

DEMO TIME
THE MAGIC IS IN “EXIT 0 – EXIT 1”

Some use cases

- **Battery Health with end user notification**
- **Disk space with end user notification**
- **Uptime check (has the computer rebooted the last x days) with notification**
- **Reporting on Bitlocker status**
- **Collect Custom Inventory**
- **Manage local admins**

- **And much more.. And ideas come to mind?**

DIVING INTO THE DETAILS

Where is the stuff?

- Health scripts is copied down to the local device:
 - C:\Windows\IMECache\HealthScripts
- Local Logs is found here:
 - C:\ProgramData\Microsoft\IntuneManagementExtension\Logs
- Local status information in registry:
 - HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\IntuneManagementExtension\SideCarPolicies\Scripts
- List Policy IDs from Graph
 - <https://graph.microsoft.com/beta/deviceManagement/deviceHealthScripts?select=id,displayname>
